Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The examiner suggests that applicant delete references to various claims on page 1 of the specification, as these references are either unnecessary, or inaccurate (e.g. subclaims 2-10 on line 28).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 has been amended to include the “umbrella-sealing plug with an umbrella membrane”, which is particular to the embodiment shown in Fig. 1. However, dependent claims 8 and 9 contain recitations to the integral damping shoe, which is particular to the embodiment of Fig. 2. The combination of the integral damping shoe of Fig. 2 with the “umbrella-sealing plug with an umbrella membrane” of Fig. 1 was not disclosed in the application as filed. This is a new matter rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Krimmer et al. (US Patent Number 5,878,991).

Krimmer et al. disclose an electromagnetically actuatable valve (10) comprising a magnet part (13), a moveable armature element (27), a spring element (31), and a valve part (see upper portion of Fig. 1), whereby the magnet part has at least one magnetic coil (16) wound on a coil form (17), a flux concentrating element (14) and a center pole (15), and the valve part has a closing element (332) that cooperates with the armature element (27) and controls the opening and closing of the valve on a valve seat (26), characterized in that the armature element is designed as a clapper-type armature and cooperates with the center pole by way of a damping element (333); wherein, the closing element and the damping element are designed as an integral damping shoe (331, 332, 333, and 334).

Allowable Subject Matter

6. Claims 1-5 and 7 are allowed.

Response to Arguments

7. Applicant's arguments filed 22 July 2003 with respect to claim 10 have been fully considered but they are not persuasive.

Applicant argues that Krimmer et al. do not disclose that the closing element and the damping element are not an integral damping shoe. The examiner disagrees. Krimmer et al. clearly disclose that the closing element (332) and damping element (333) are part of an integral piece that wraps around both sides of the armature in the same manner as applicant's Fig. 2 shows a closing element (11) and damping element (13) that wraps around both sides of the armature.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
